Sense™

Sense

Designed by Daniel Korb, 2008

Sense is a simple and elegant desking solution which fits seamlessly into the modern office landscape. Tools and accessories support a range of desking options which can be tailored to the character of each organisation, and the individuals and groups who work there. Sense has a clean and modern aesthetic that, when paired with our collaborative furniture and task seating, creates a welcoming, functional, and inspiring office where people want to be – and do their best work.

About Daniel Korb

“The age of Leonardo da Vinci is gone”, notes designer Daniel Korb, “but still I believe a holistic view to the world is needed”. Baden, Switzerland, is the vantage point for Korb’s perspective. It’s where he was born and the place where he and his wife Susan operate Korb + Korb, which they founded in 1989.

Like many leading designers of modern office furniture, Korb started as an architect. Since then, his design expertise has broadened and his inspiration refined. Today, his creativity finds expression in architecture, communication and design. The intersection of these disciplines results in innovative ideas and, ultimately, smarter end products.

Daniel Korb

A Sensible Solution

With its streamlined design, Sense is easy to specify and install. A range of practical features and accessories is available; from wire management baskets, to attachable power sockets, screens, trays, drawers and other storage options. It is a simple and cost-effective way to bring people together, encourage collaboration and increase productivity.

Elegant Design

Sense is intelligently designed to ensure simplicity of use. It has a clean aesthetic which makes it an elegant addition to any workplace. Sense is available in a range of contemporary colours, materials and finishes to suit many styles and tastes, and to complement chairs and other furniture elements.

Sense tables are practical for use in areas such as meeting rooms, team breakout areas, or informal spaces for colleagues to meet and collaborate.

Smart Choices

Whether it's configured as meeting tables, standing-height tables, individual desks, 120-degree desks or team clusters of bench desking, Sense can cater to a wide variety of settings. When combined with accessories like a unique tool bar and attachable storage, Sense becomes the smart companion for the modern office worker.

Sense standing height table integrated with Stem to create a breakout or collaborative area.

Sense 120-degree cluster of three for highly collaborative teams to encourage dialogue and discussion.

Typical desking configuration fully supported with mobile caddies, drawer, tool rail and glass screen.

Easy Assembly

It's easy to create and configure Sense in a variety of settings and styles. A simple set of components is all you need to build the structure of a single Sense desk. Add more to create multiple clusters of desks. Choose screens and accessories to tailor your work space.

Details and Accessories

Sense's unique tool bar allows you to attach a wide range of useful accessories, to easily store paperwork, organise belongings and support you better.
