

## **ABAK ENVIRONMENTS**

### INTERNATIONAL APPEAL, DIVERSE APPLICATION

A truly global design, the Abak desking system creates workable, welcoming environments in offices around the world. Designed to meet the particular needs of multinational organizations for flexible furnishings that can be standardized across continents and cultures, Abak's simple set of versatile components supports a world of diverse working styles and aesthetic preferences.

With strong horizontal lines, a light profile, and translucent and reflective surfaces, Abak's international style blends seamlessly with virtually any architectural interior. Elegant detailing and a palette of rich neutrals create a consistently clean and contemporary look throughout facilities and adapt easily to regional styles and tastes.

Abak's twin-beam understructure and performance wall accept work surface and screen components at any point along linear or 90- or 120-degree configurations to furnish private offices, meeting areas, or open plan environments anywhere in the world.

## Materials

Abak opens up new aesthetic opportunities for desk-based environments. Components, colors, and materials blend to establish Abak's horizontal theme. Translucent and reflective materials make a space feel larger and more open. And with its slender profile and light scale, Abak allows the architecture to take center stage.
